

# MAVRON WARRANTY

MAVRON prisoner transport units are warranted against defects in workmanship and/or materials for a period of five years from the time that the unit is placed in service.

Although included in the sale of the MAVRON unit, equipment that is not produced by MAVRON, INC. will be warranted by the original equipment manufacturer and shall be subject to the terms and conditions of the warranties provided by the individual manufacturers.

This warranty does not cover damage due to abuse, accident or improper use.

Defective components will be repaired or replaced at the purchaser's location or the MAVRON factory, at the discretion of the manufacturer. Transportation costs, if necessary, will be paid by the purchaser.

Employees, representative agents or dealers cannot extend or modify, verbally or in writing, the warranty stated herein. There are no warranties, expressed or implied, made by the seller or supplier, which extend beyond the description on the face hereof. All warranties herein stated are expressly in lieu of all other warranties, expressed or implied, including any implied warranty of merchantability or fitness for a particular purpose.

Buyer's sole and exclusive remedy for breach of all warranties pertaining to the goods shall be the repair or the replacement of any defective parts thereof due to faulty workmanship, material or construction.

All claims against the MAVRON unit must be presented to the home office of MAVRON, INC. by a qualified person (shop foreman, etc.) describing the nature of the claim. The warranty claim must be filed prior to the initiation of any repair, adjustment or replacement of parts. MAVRON, INC. will then issue a repair authorization number to authorize the repair work. MAVRON will not assume any liability for repair work done, unless MAVRON has approved the work and issued a repair authorization number. Failure to get MAVRON's approval prior the repair work being done will void MAVRON's financial responsibility and quite possibly void the entire warranty.

Please call MAVRON prior to taking the vehicle in for repair for any Air Conditioning issues (if your unit is equipped with a MAVRON installed rear A/C unit). Most automotive dealer service departments do not prefer to work on after-market A/C installations.

MAVRON, INC., 152 S. Zimmer Rd., Warsaw, IN 46580 (800) 551-1498
